

Amended Claims with Editing Marks

1 31. (amended) A window sash assembly comprising:

2 a sash having a header rail and a stile joined at a corner and having an
3 opening in the sash; [and]

4 a tilt latch disposed in the opening including a housing having side walls, a
5 rear wall, and a bottom wall;

6 a top wall extending beyond the side walls and rear wall to define a flange;

7 a protuberance projecting from each of the side walls, each protuberance
8 having [an] a pointed apex spaced from the flange to define respective gaps for
9 receiving the edges therein; and

10 a bolt movably disposed in the housing and adapted for engaging a slide
11 channel.
